

**DECLARATION OF JIAN NI, GUO-LIANG YU, PEDRO ALFONSO,
JEFFREY SU AND REINER GENTZ UNDER 37 C.F.R. § 1.131**

Each of the inventors of U.S. Patent Application No. 08/761,289, filed December 6, 1996, and U.S. Patent Application No. 09/227, 854, filed January 11, 1999, Jian Ni, Guo-Liang Yu, Pedro Alfonso, Jeffrey Su, and Reiner Gentz, hereby declare and state as follows:

1. I am an inventor of the subject matter described and claimed in the above U.S. Patent Applications, which are assigned to Human Genome Sciences, Inc. (HGS). The work described below occurred at HGS, which is located in Rockville, Maryland, U.S.A.
2. The above-identified patent application relates to the isolation and characterization of a cDNA encoding a novel gene product designated Chemotactic Cytokine I (CCI).
3. A cDNA clone designated "HALTA54" (479,617), was deposited with the American Type Culture Collection (ATCC) on September 25, 1995 and was assigned ATCC Accession Number 97304 (*see* Exhibit A). Exhibit B, attached hereto, is a redacted printout of data from the HGS electronic documentation system IRIS, which shows the nucleotide sequence (No. 479,617) corresponding to cDNA clone HALTA54. The "Date Sequenced" redacted from Exhibit B is prior to March 6, 1995. Exhibit C, attached hereto, is a redacted printout of a Batch Worksheet which evidences expression of the protein encoded by clone HALTA54 in a baculovirus

expression system. The redacted date upon which this Batch Worksheet was generated is prior to March 6, 1995.

4. The nucleotide sequence disclosed in Exhibit B corresponds to the sequence disclosed in Figure 1 of the above-identified application and U.S. Provisional Application Serial No. 60/008,387, a copy of which is attached herewith as Exhibit D and E, respectively. The only differences between the sequence shown in Exhibits D and E is the exclusion from Exhibits D and E of the initial two G nucleotides and the final G nucleotide (i.e., nucleotides 1, 2 and 483) shown in Exhibit B. The cDNA clone HALTA54 (ATCC Deposit No. 97304) and Exhibit B both contain the entire sequence shown in Exhibits D and E.

5. I declare further that all statements made in this Declaration of my own knowledge are true, and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. § 1001, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.

BUDAPEST TREATY ON THE INTERNATIONAL RECOGNITION OF THE DEPOSIT OF MICROORGANISMS FOR THE PURPOSES OF PATENT PROCEDURE

INTERNATIONAL FORM

RECEIPT IN THE CASE OF AN ORIGINAL DEPOSIT ISSUED PURSUANT TO RULE 7.3 AND VIABILITY STATEMENT ISSUED PURSUANT TO RULE 10.2

To: (Name and Address of Depositor or Attorney)

RECEIVED

Human Genome Sciences
Attention: Robert H. Benson
9410 Key West Avenue
Rockville, MD 20850

HGS PATENT DEPT.

Deposited on Behalf of: Human Genome Sciences

Identification Reference by Depositor:

ATCC Designation

DNA Plasmid, 479617 (Docket PF210)

97304

The deposits were accompanied by: — a scientific description — a proposed taxonomic description indicated above.

The deposits were received September 25, 1995 by this International Depository Authority and have been accepted.

AT YOUR REQUEST:

☒ We will inform you of requests for the strains for 30 years.

The strains will be made available if a patent office signatory to the Budapest Treaty certifies one's right to receive, or if a U.S. Patent is issued citing the strains and ATCC is instructed by the United States Patent & Trademark Office or the depositor to release said strain.

If the cultures should die or be destroyed during the effective term of the deposit, it shall be your responsibility to replace them with living cultures of the same.

The strains will be maintained for a period of at least 30 years after the date of deposit, and for a period of at least five years after the most recent request for a sample. The United States and many other countries are signatory to the Budapest Treaty.

The viability of the cultures cited above was tested October 5, 1995. On that date, the cultures were viable.

International Depository Authority: American Type Culture Collection, Rockville, Md. 20852 USA
